
Development
Literature check
paper, definitions, stated guarantee
Implementation
developer or Codex, PAMI-style API
Brute-force oracle
every batch, every period, random + drifting streams
Mutation checks
deliberately broken code must fail the tests
Guarantee holds?
No
Yes
Document
docstring + README: guarantee and limits
Push
Fork branch
Pull
Review
Clean clone
apply the patch, fresh virtual environment
Rerun all tests
real terminal output, not summaries
Independent probes
own oracle, adversarial and near-threshold streams
Issues found?
No
Fast-forward merge
git merge --ff-only
Push
Fork main
Yes: fix the code or the specification, start again
Release
Benchmarks
vs exact baseline: patterns, runtime, memory
Confirm design
against the original paper (every CONFIRM item)
README
algorithm table, guarantees, figures
Ready for PR?
No
Yes
